

Pressure Gauge Series

Features

- 304 stainless steel shell, anti-corrosion and wear-resistant
- Quick pressure measurement: hydraulic, water and oil pressure, air pressure
- Pressure panel can be customized, various units, MPa, bar, kg/cm², psi, 1MPa=10bar=10kg/cm²≈145psi
- Pressure change drive spring tube indicates pressure value
- Threaded joint, easy installation support customization

Applications

- Petroleum, chemical industry, chemical fiber, metallurgy, power station, food processing and other industries
- Thermal pipe network, oil and gas transmission, water and gas supply systems, precision instruments and equipment and other industrial control fields

Specifications

Type	YLB60、100、150, Oil-filled shock resistance is optional
Advantage	Economical and suitable; No power supply
Range	-0.1~100MPa
Table Size	60mm、100mm、150mm
Install port	M20*1.5、G1/2 (By customized)
IP rating	IP65

Material	304
Accuracy	2.5, 1.0, 1.6
Working temp	-20~70℃
Medium Temp	0~70℃
Apply	No explosion risk, no crystallization, no solidification, And the medium pressure such as liquid, steam or gas that does not corrode the copper alloy

Size

Unit : mm
